PROFESSIONAL SUMMARY

Systems Analyst and UI/UX Lead at SMITS with a background in frontend engineering. Turns business needs into requirements, user flows, and backlogs that developers can build from, and supports Product Owner work through refinement, prioritization, and client workshops. Trains colleagues in UI/UX and helps govern the SMITS design system. Uses AI to turn ideas into working prototypes quickly, with guardrails that make it safe for real work.

SKILLS

Business Analysis: Systems Analysis, Requirements Analysis, Functional Requirements, Process Mapping, User Stories, Acceptance Criteria, Requirements Traceability, Stakeholder Management, Solution Validation

Product Delivery: Product Discovery, Product Owner Support, Backlog Refinement, Feature Prioritization, Agile Delivery, Client Workshops, Cross-functional Collaboration

AI: AI-assisted Prototyping, Prompt Engineering, LLM App Integration, Privacy-aware Data Masking, Responsible AI Use; tools include Claude, ChatGPT, Gemini, and GitHub Copilot

UX and Technology: UX Strategy, UI/UX Design, Prototyping, Design Systems, Figma, React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, REST APIs, GraphQL, Git, GitHub, Jira

EXPERIENCE

Systems Analyst - UI/UX Lead

Jul 2026 - Present

SMITS, Inc. - IT Company of San Miguel Corporation | Pasig, Philippines

- Translate business needs into functional requirements, user flows, acceptance criteria, and delivery-ready feature scopes in partnership with Business Analysts, System Analysts, developers, and stakeholders.
- Support Product Owner initiatives through backlog refinement, feature prioritization, requirements validation, client workshops, and solution reviews, keeping business value, usability, and feasibility aligned.
- Plan and conduct internal UI/UX training for 50 colleagues across business analysis, project management, systems analysis, development, and QA, helping project teams apply user-centered design and consistent usability practices across SMITS applications.
- Collaborate with the Development Lead on the internal SMITS Design System, contributing UX standards, reusable interface patterns, component guidance, and governance practices.
- Support the responsible use of AI within SMITS by evaluating AI-assisted workflows for requirements analysis, design, prototyping, development, testing, and documentation.

Information Technology Application Specialist - UI/UX

Jul 2025 - Jun 2026

SMITS, Inc. - IT Company of San Miguel Corporation | Pasig, Philippines

- Designed and improved enterprise and legacy application interfaces by translating business and system requirements into user flows, wireframes, prototypes, and implementation-ready specifications.
- Partnered with Business Analysts, System Analysts, and developers to refine feature scope, prioritize interface improvements, and support iterative delivery.
- Helped establish a more structured UI/UX practice through reusable design standards, interface patterns, and documented workflows.

Software Developer - Frontend

Mar 2023 - Jun 2025

Mashup Garage | Philippines

- Led the redesign and performance optimization of Metrobank's branding website, aligning business requirements and success measures with user experience and product goals.
- Served as the frontend team's informal technical lead, coordinating day-to-day delivery and providing implementation guidance across the development team.
- Built scalable, reusable React.js and Next.js components and design-system patterns that improved interface consistency and reduced repeated implementation effort.
- Partnered with cross-functional stakeholders to validate responsive requirements and standardize delivery practices across device types.

Junior Cloud Engineer

Jun 2022 - Mar 2023

Senti AI | Philippines

- Reworked the company-wide Fastify, Lit, and Terraform starter templates so new projects needed less setup.
- Supported sprint delivery and bug prioritization for a high-profile retail reimbursement platform.
- Helped define requirements for the OCR and Google Cloud services behind SM Prime Holdings' finance-processing portal, which digitizes more than 50,000 files monthly.

Frontend Developer

Nov 2021 - Jun 2022

Anteriore Inc. | Philippines

- Developed Playable.io using React.js and Tailwind CSS, translating product requirements and user stories into a user-centered blockchain application.
- Led the technical transition to NEAR Protocol and GraphQL by coordinating requirements, edge-case handling, stakeholder alignment, and performance benchmarks.

EARLIER EXPERIENCE

Founder and Product Design Engineer

MetaTech Lab | Taguig, Philippines

Dec 2019 - Nov 2021

Product Design Engineer / Intern

Proudcloud | Quezon City, Philippines

May 2018 - Dec 2019

SELECTED PROJECTS

Spend Master: Procurement Spend Analytics

[Live Demo](#)

Gives procurement heads one view of spend, contract coverage, and suppliers shared across business units, with optional AI findings limited to each viewer's data.

JavaScript, Chart.js, role-based access, LLM integration

Fraud Master: Credit Memo Risk Review

[Live Demo](#)

Helps a finance team triage credit memos: a rules engine scores each one and routes it to Investigate, Review, or Straight-through, with views for reviewers, leads, controls, and audit.

JavaScript, rules-based risk scoring, role-based access, LLM explanations on locally masked data

Backlog Board: TanStack Query Demo

[Live Demo](#) | [GitHub](#)

A backlog board showing how a data layer should feel to users: instant updates and safe rollback when a save fails.

React 19, TypeScript, TanStack Query, Vite

ENTREPRENEURSHIP AND COMMUNITY

Strategic Marketing and Operations Lead

Jul 2020 - Present

A&J 3D Printing Services | E-commerce store on Shopee

- Grew revenue nearly 8x over three years by running end-to-end operations and a cross-functional team.
- Ran concept, A/B, and user testing for new product lines and led their go-to-market; influencer and digital campaigns drew 350,000+ unique visitors and 1M+ page views.
- Earned Shopee Preferred Seller status through reliable fulfillment, customer service, and policy compliance; named one of the top 3D printing stores in the Philippines by WhenInManila.com (2022).

Community Operations Lead

Pasig Badminton | Facebook community, 16,700 members

- Run a community averaging 2,300 daily viewers; from late 2025 to mid 2026, quarterly views and reactions grew 80% and comments grew 2.5x.
- Screened 1,400+ join requests and moderated 440+ posts; also organized a large-scale MMBC Group tournament and raised Olympic Badminton Center's social engagement 20%.

EDUCATION

Diploma in Logistics, Materials, and Supply Chain Management

2021

De La Salle University - Manila x Zaragoza Logistics Center of Spain

BS Manufacturing Engineering and Management

2019

Specialization in Mechatronics and Robotics Engineering | De La Salle University - Manila

CERTIFICATIONS

Design Thinking: Understanding the Process | Six Sigma Foundations

LinkedIn Learning, 2021
