PROFESSIONAL SUMMARY

Systems Analyst and UI/UX Lead with experience spanning business analysis, product discovery, frontend development, and enterprise application delivery. Translates business needs into functional requirements, process and user flows, prioritized backlogs, acceptance criteria, and delivery-ready specifications while aligning stakeholders on business value, user needs, and technical feasibility. Current work includes Product Owner support, internal UI/UX training, collaborative design-system governance, and the responsible adoption of AI-assisted workflows within SMITS.

SKILLS

Business Analysis: Systems Analysis, Requirements Analysis, Functional Requirements, Process Mapping, User Stories, Acceptance Criteria, Requirements Traceability, Stakeholder Management, Solution Validation

Product Delivery: Product Discovery, Product Owner Support, Backlog Refinement, Feature Prioritization, Agile Delivery, Client Workshops, Cross-functional Collaboration

UX and Technology: UX Strategy, UI/UX Design, Prototyping, Design Systems, AI-Assisted Workflows, React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, REST APIs, GraphQL, Git, GitHub

EXPERIENCE

Systems Analyst - UI/UX Lead

July 2026 - Present

SMITS, Inc. - IT Company of San Miguel Corporation | Pasig, Philippines

- Translate business needs into functional requirements, user flows, acceptance criteria, and delivery-ready feature scopes in partnership with Business Analysts, System Analysts, developers, and stakeholders.
- Support Product Owner initiatives through backlog refinement, feature prioritization, requirements validation, client workshops, and solution reviews while maintaining alignment among business value, usability, technical feasibility, and requirements traceability.
- Plan and conduct internal UI/UX training sessions that help project teams apply user-centered design and consistent usability practices across SMITS applications.
- Collaborate with the Development Lead and relevant teams on the internal SMITS Design System initiative, contributing UX standards, reusable interface patterns, component guidance, documentation, and governance practices.
- Support the formal and responsible use of AI within SMITS by contributing to internal initiatives and evaluating AI-assisted workflows for requirements analysis, design, prototyping, development, testing, and documentation.

Information Technology Application Specialist - UI/UX

July 2025 - June 2026

SMITS, Inc. - IT Company of San Miguel Corporation | Pasig, Philippines

- Designed and improved enterprise and legacy application interfaces by translating business and system requirements into user flows, wireframes, prototypes, and implementation-ready specifications.
- Partnered with Business Analysts, System Analysts, and developers to refine feature scope, prioritize interface improvements, and support iterative delivery.
- Helped establish a more structured UI/UX practice through reusable design standards, interface patterns, and documented workflows.

EXPERIENCE (CONTINUED)

Software Developer - Frontend

March 2023 - June 2025

Mashup Garage | Philippines

- Led the redesign and performance optimization of Metrobank's branding website, aligning business requirements and success measures with user experience and product goals.
- Built scalable, reusable React.js and Next.js components and design-system patterns that improved interface consistency and reduced repeated implementation effort.
- Partnered with cross-functional stakeholders to validate responsive requirements and standardize delivery practices across device types.

Junior Cloud Engineer

June 2022 - March 2023

Senti AI | Philippines

- Enhanced company-wide Fastify, Lit, and Terraform templates to streamline engineering workflows and reduce project setup effort.
- Supported sprint delivery and bug prioritization for a high-profile retail reimbursement platform, aligning technical work with stakeholder requirements.
- Contributed requirements for OCR and Google Cloud services in SM Prime Holdings' finance processing portal, supporting the digitization of more than 50,000 files monthly.

Frontend Developer

November 2021 - June 2022

Anteriore Inc. | Philippines

- Developed Playable.io using React.js and Tailwind CSS, translating product requirements and user stories into a user-centered blockchain application.
- Led the technical transition to NEAR Protocol and GraphQL by coordinating requirements, edge-case handling, stakeholder alignment, and performance benchmarks.

EARLIER EXPERIENCE

Founder and Product Design Engineer

MetaTech Lab | Taguig, Philippines

December 2019 - November 2021

Product Design Engineer / Intern

Proudcloud | Quezon City, Philippines

May 2018 - December 2019

EDUCATION

Diploma in Logistics, Materials, and Supply Chain Management

De La Salle University - Manila x Zaragoza Logistics Center of Spain

2021

BS Manufacturing Engineering and Management

Specialization in Mechatronics and Robotics Engineering | De La Salle University - Manila

2019
