PROFILE

A software developer that has experiences front-end and cloud infrastructure development with a background in Supply Chain and Logistics, E-commerce business management, and Operations knowledge. Coming from a product design background, I have developed a "can-do" attitude and "out-of-the-box" thinking towards solving problems.

EXPERIENCE

2023 March -
Present

● Front-end Software Developer

Mashup Garage

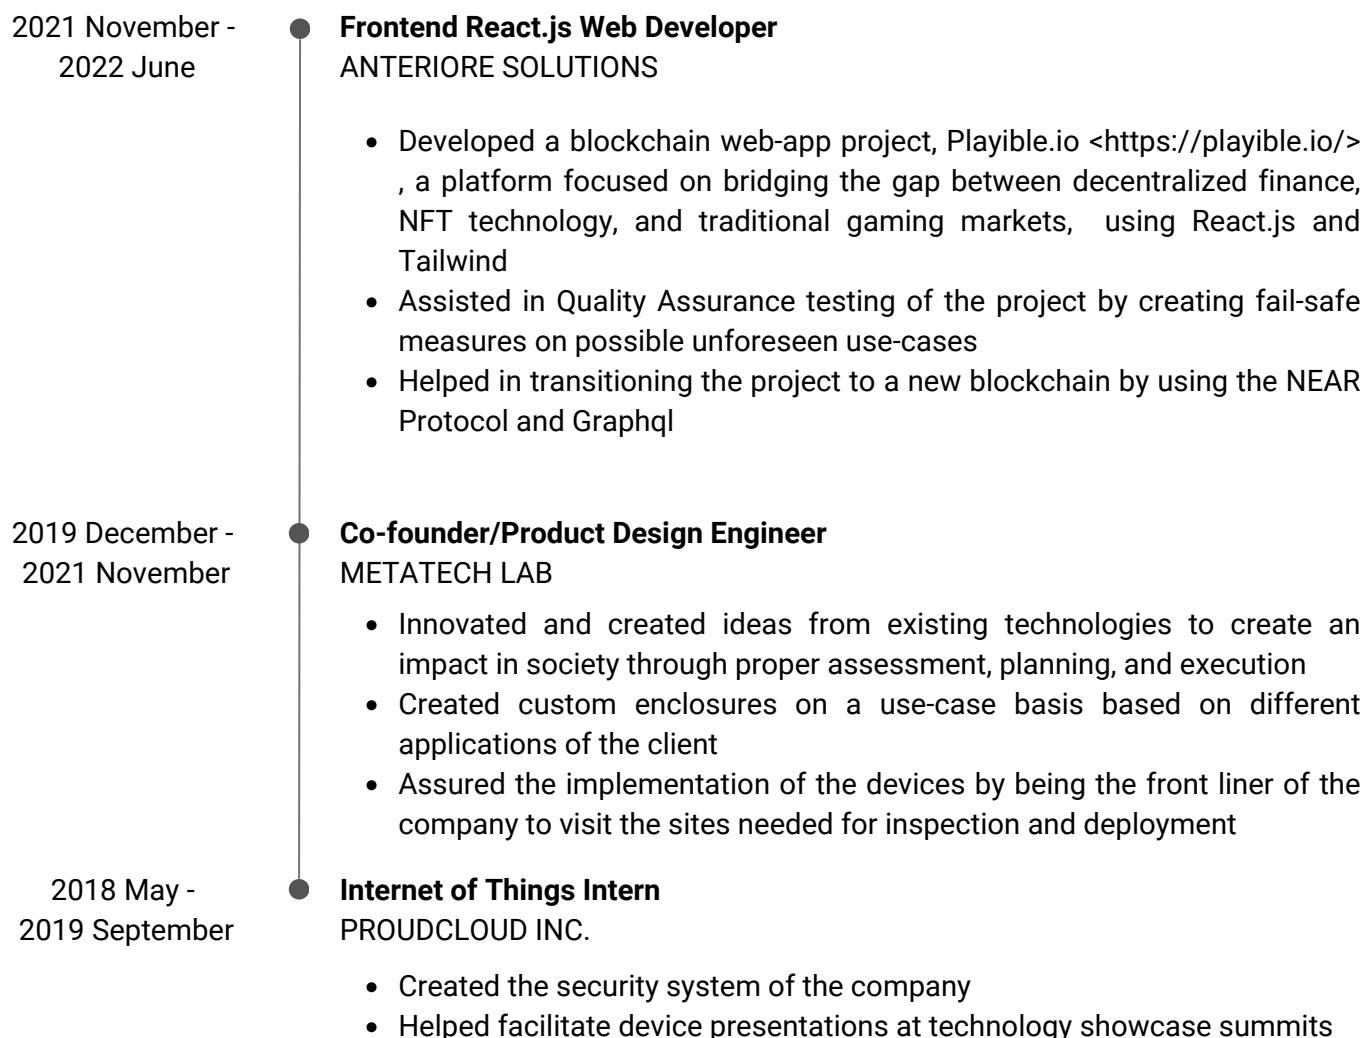

- Actively contributing to one of the major banks in the Philippines' website that is used by thousands of users daily by creating new content and features through UI/UX design and optimization
- Created guides and reusable templates (through Gsheets) that benefited the whole team in standardizing approaches of the client's design team that affected the whole project's feature and interaction through all screens
- Frameworks that I am using are: React.js, Next.js, Node.js, Tailwind, Native CSS, Framer Motion, and DatoCMS

2022 June -
2023 March

● Junior Cloud Engineer

SENTI.AI

- Updated the company wide templates used in the development process of all Senti.ai engineers by implementing the use of Fastify (Backend framework), Lit (Frontend framework), and Terraform cloud infrastructure.
- Assisting in support engineering tasks and development for current bug fixes and technical sprints with SM Philippines (BIR 2307 reimbursement project) that aims to create a portal wherein thousands of staff and accounting personnel use for finance processing through the use of Optical Character Recognition (OCR) by digitizing more than 50,000 files on a monthly basis with the use of Google Cloud Computing Services, Angular.js, Express.js, and Terraform.

- 
- A vertical timeline on the left side of the page, with a central line and dots marking the start of each job. The dates are listed to the left of the line, and the job titles and descriptions are to the right.
- 2021 November - 2022 June ● **Frontend React.js Web Developer**
ANTERIORE SOLUTIONS
- Developed a blockchain web-app project, Playible.io <<https://playible.io/>> , a platform focused on bridging the gap between decentralized finance, NFT technology, and traditional gaming markets, using React.js and Tailwind
 - Assisted in Quality Assurance testing of the project by creating fail-safe measures on possible unforeseen use-cases
 - Helped in transitioning the project to a new blockchain by using the NEAR Protocol and GraphQL
- 2019 December - 2021 November ● **Co-founder/Product Design Engineer**
METATECH LAB
- Innovated and created ideas from existing technologies to create an impact in society through proper assessment, planning, and execution
 - Created custom enclosures on a use-case basis based on different applications of the client
 - Assured the implementation of the devices by being the front liner of the company to visit the sites needed for inspection and deployment
- 2018 May - 2019 September ● **Internet of Things Intern**
PROUDCLOUD INC.
- Created the security system of the company
 - Helped facilitate device presentations at technology showcase summits

EDUCATION

DE LA SALLE UNIVERSITY - MANILA x ZARAGOZA LOGISTICS CENTER OF SPAIN (May - July 2021)

Diploma Course in Supply Chain and Logistics

DE LA SALLE UNIVERSITY - MANILA (2014 - 2019)

Bachelor of Science in Manufacturing Engineering and Management with Specialization in Mechatronics and Robotics Engineering

SOFT SKILLS

- Teamwork
- Leadership
- Time Management
- Flexibility
- Empathy
- Problem-solving
- Sales
- Rapport-building
